WOLFRAM

We Light The Way

As Safe As Real Light Source

Taking its name from the first step of bulb production, **WOLFRAM** automotive bulbs are produced in environmentally friendly and nature-friendly fully automated factories equipped with high technology in Germany, and complementary products are manufactured in Korea and China.

WOLFRAM automotive bulbs are produced for the front, rear, and interior lighting of cars, light commercial vehicles, heavy-duty trucks, and motorcycles worldwide.

WOLFRAM automotive bulbs, including standard bulbs as well as innovative automotive bulbs, LED headlights, and fog lights, offer a wide variety of options and high quality to fully ensure customer satisfaction. The desire to provide better lighting options is the main driving force behind the continuous R&D efforts of our engineers working on **WOLFRAM** automotive bulbs.

WOLFRAM automotive bulbs will ensure that people see better now and in the future, move more comfortably, and drive safely. Today, it is not only essential for lighting bulbs to function and last long but also to provide price competitiveness to dealers.

WOLFRAM, as the inventor of automotive bulb technology, is a pioneer in halogen and miniature bulbs, adding innovation to everything it does with high performance and durability.

AutomobileLightingSolutions

High-Performance Lighting Solutions for 12-Volt Vehicles Wolfram offers high-performance lighting solutions designed for 12-volt vehicles.

The wide range of products appeals to all needs and tastes. Whether you are looking for classic halogen lighting or modern and special effect solutions, you can find what you are looking for at Wolfram. The Halogen Headlight Bulb Series offers a reliable and economical lighting solution, while the Lensed Bulb Series provides a more focused and clear light. While the Stop Signal Bulb Series increases your safety, the Dipsiz Bulb Series and Sofit Bulb Series combine elegance and functionality in interior lighting. The Socketed Indicator Bulb Series ensures that your instrument panel is clear and readable. Our special series take your driving experience to the next level. The Halogen Sky Blue Series gives your vehicle a modern and eye-catching look, while the Halogen Night Vision Series significantly increases your visibility during night driving. The Halogen Ultra Vision Series offers excellent lighting in all conditions with its extraordinary brightness.

Why Wolfram Lighting Solutions?

Wide Range of Products: Bulb options suitable for all needs.

High Performance: Superior lighting power and long life.

Increased Safety: Better visibility day and night.

Stylish Design: Special series that give your vehicle a modern look.

Reliability: High-quality materials and meticulous production process.

Make your driving safer, more comfortable and more enjoyable with Wolfram bulbs, most of which are produced in Germany. With its high performance, stylish design and long life features, Wolfram has an E certificate in accordance with European standards and is your reliable partner in vehicle lighting solutions.

Reliable and Economical Lighting Most of the production is made in Germany. Wolfram's standard halogen series is a reliable and economical lighting solution for 12-volt vehicles. These bulbs are produced with standard halogen technology and offer a safe driving experience by clearly illuminating your road.

Thanks to their affordable price and easy availability, they are an ideal option for vehicle owners. Wolfram standard halogen bulbs are long-lasting and durable, so you can get rid of the hassle of changing bulbs frequently. Whether you are in the city or on a long journey, enjoy a safe and comfortable drive with the Wolfram standard halogen series, which has an E certificate in accordance with European standards.

Automobile Lighting Solutions

Sky Blue 50 Series

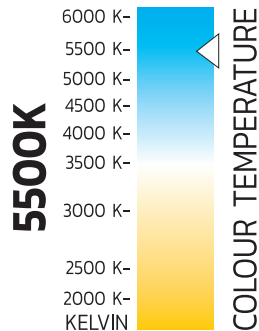

WOLFRAM
PREMIUM QUALITY

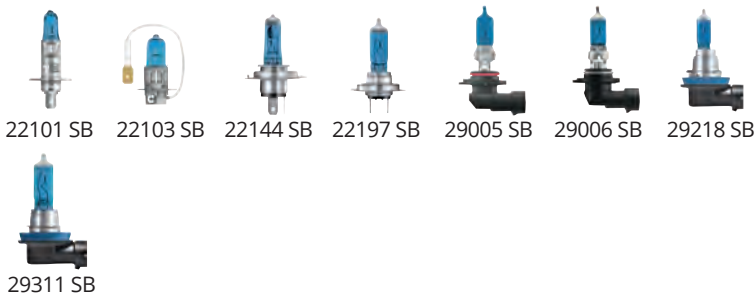

Superior Lighting with Xenon Look Wolfram's Sky Blue series, with its 5500 Kelvin Ice White Blue color temperature and +% 50 more light power, gives your vehicle a xenon-like appearance while offering a unique white color lighting experience during your night driving.

This special series increases your driving safety by making road signs and obstacles more visible thanks to the bright and blue-toned light it emits. Sky Blue bulbs provide a wider viewing angle than standard halogen bulbs, making your night journeys more comfortable. With both its stylish look and high performance, the Wolfram Sky Blue series adds a modern touch to your vehicle while also prioritizing your safety.

Night Vision 150 Series

WOLFRAM
PREMIUM QUALITY

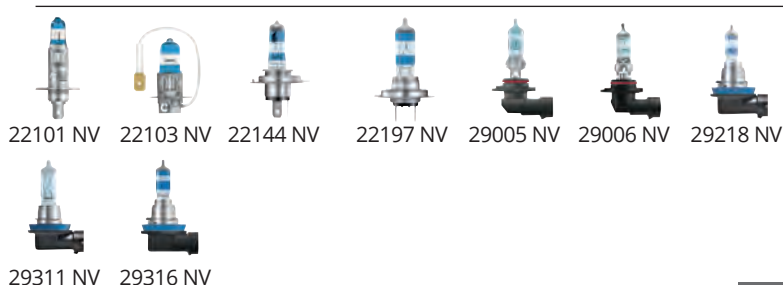

Xenon Appearance that Turns Night into Day produced with high technology thanks to the special coating on its glass Wolfram's Night Vision series offers an extraordinary lighting performance during your night drives with +150% more light power compared to standard products with a color temperature of 3900 Kelvin.

This series maximizes your driving safety by allowing you to see your road more clearly thanks to its bright and white light similar to xenon. Night Vision bulbs offer a wider viewing angle compared to standard halogen bulbs, illuminating more areas in the dark. Providing excellent performance in difficult weather conditions, the Wolfram Night Vision series makes your night drives safer and more comfortable. While giving your vehicle a modern look, it has an E certificate in accordance with European standards; It also significantly improves your safe night vision.

Ultra Vision 200 Series

WOLFRAM
PREMIUM QUALITY

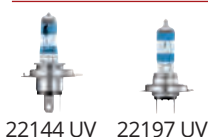

Xenon Elegance with Unrivalled Lighting Wolfram's Ultra Vision series offers a unique lighting experience during your night drives with its 4300 Kelvin color temperature and +%200 more light power compared to standard products.

Thanks to its xenon-like bright and white light, this series maximizes your driving safety by illuminating your road as if it were daytime. Ultra Vision bulbs provide a much wider viewing angle than standard halogen bulbs, ensuring you don't miss any details in the dark. Providing superior performance even in difficult weather conditions, the Wolfram Ultra Vision series makes your night drives safer and more comfortable. While it gives your vehicle a modern and stylish look, it has an E certificate in accordance with European standards and incredibly improves your safe night vision.

Miniature Halogen Bulbs Series

WOLFRAM
PREMIUM QUALITY

Reliable and Economical Lighting, most of which is produced in Germany Wolfram's standard miniature halogen series is a reliable and economical lighting solution for 12-volt vehicles.

These bulbs are produced with standard halogen technology and provide a strong view by clearly illuminating your vehicle's parking lights and ceiling lights. Thanks to their affordable price and easy availability, they are an ideal option for vehicle owners.

Wolfram standard miniature halogen bulbs are long-lasting and durable, so you can get rid of the hassle of changing bulbs frequently. Whether you are in the city or on a long journey, the Wolfram standard miniature halogen series has an E certificate in accordance with European standards and enjoy your vehicle with safe and comfortable lighting.

Automobile Lighting Solutions

Stop Signal Bulbs Series

WOLFRAM
PREMIUM QUALITY

A Bright Solution That Prioritizes Your Safety Wolfram's stop signal bulb series is a high-performance and reliable lighting solution designed for 12-volt vehicles.

It increases your safety by allowing other drivers to easily notice you with its standard light power. Thanks to its fast response time, it instantly activates when you brake and sends a timely warning to vehicles behind.

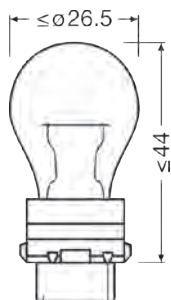

Wolfram stop signal bulbs also stand out with their long-lasting structure and easy installation. In order not to risk your safety, Wolfram stop signal bulbs have an E certificate in accordance with European standards and make your journeys safer and more secure.

HeavyVehicleLightingSolutions

Professional Solutions, Reliable Performance Wolfram's 24V product series is specifically designed to meet all electrical and lighting needs of commercial vehicles, trucks, buses, construction equipment and other heavy-duty vehicles. Manufactured with high-quality materials and engineering, these products offer superior performance and long-lasting use even under difficult conditions. Our series offers a wide range of solutions from headlights to signal lamps, interior lighting to special-purpose lamps. Each product is designed to fit perfectly into 24V systems and stands out with its easy installation and reliable operation.

Why Wolfram 24V Product Series?

Wide Range of Products: Solutions from a single source for all your lighting and electrical needs.

High Quality: Durable, long-lasting and reliable products resistant to harsh weather conditions such as snow, rain and fog.

Optimum Performance: Special design for 24V systems, maximum efficiency and brightness.

Easy Installation: User-friendly design for fast and trouble-free installation.

Reliable Brand: Professional solutions with Wolfram quality and assurance.

Increase the performance and safety of your vehicles with the Wolfram 24V product series. Discover the most suitable solutions for your needs and experience and make others experience the Wolfram difference with your Vehicles!

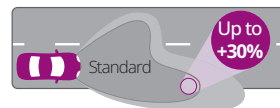

Heavy Vehicle Lighting Solutions

Truck Vision 150 Series

WOLFRAM
PREMIUM QUALITY

The Wolfram Truck Vision 24V series consists of high-performance bulbs designed for commercial vehicles, trucks, and buses. These bulbs enhance road safety by providing superior visibility at night and in adverse weather conditions. They emit more light than standard bulbs, allowing for clearer visibility of road signs and obstacles.

Why Choose Wolfram Truck Vision 24V Series?

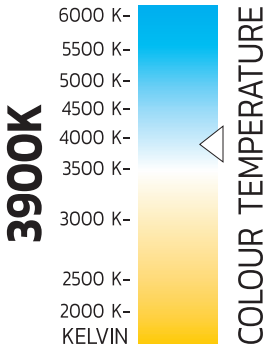

High Performance: Advanced filament technology offers improved forward visibility.

Increased Safety: Better visibility at night and in challenging conditions.

Long Life: Reduces the need for frequent bulb replacements.

Easy Installation: Installs easily like standard bulbs.

Enhance your driving experience and safety with the Wolfram Truck Vision 24V series!

Stop Signal Bulbs Series

WOLFRAM
PREMIUM QUALITY

Reliable and Bright Signals, Maximum Safety Wolfram's 24V stop and signal series is designed to increase the safety of commercial vehicles, trucks, buses and other heavy-duty vehicles. These bulbs stand out with their fast response time and high brightness level, allowing other drivers to immediately notice your vehicle's intention to stop or turn. Our range offers a variety of stop signal bulb models for different vehicle types and applications. Each Wolfram brand bulb is manufactured from durable materials and offers high resistance to harsh road conditions and vibrations.

Why Wolfram 24V Stop Signal Series?

High Brightness: Provides maximum visibility with bright and clear signals.

Fast Response Time: Instantly reacts and allows other drivers to notice it quickly.

Durable Design: Highly resistant to harsh weather conditions, difficult road conditions and vibrations.

Wide Application Area: Offers various models for different vehicle types and applications.

Reliable Performance: Provides long-lasting and stable working performance.

Maximize the safety of your vehicles with the Wolfram 24V stop signal series. Stay safe on the road with reliable and bright signals!

Wedge Base Bulbs Series

WOLFRAM
PREMIUM QUALITY

Compact, Reliable and Versatile Lighting Solutions Wolfram's 24V bottomless bulb series offers compact and reliable lighting solutions ideal for commercial vehicles, trucks, buses and other heavy-duty vehicles. Their bottomless design makes them easy to install and suitable for a variety of interior and exterior lighting applications. These bulbs can be used in a wide range of applications from instrument panel lighting to interior lighting, from signal lamps to parking lamps. Manufactured from high-quality materials, they offer long-lasting and stable performance.

Why Wolfram 24V Bottomless Bulb Series?

Compact Design: Bottomless design provides easy installation and space saving.

Versatile Application: Offers a wide range of uses for interior and exterior lighting applications.

High Reliability: Provides long-lasting and stable performance.

Wide Compatibility: Compatible with various vehicle models and systems.

Energy Efficiency: Provides high light output with low energy consumption.

Meet the lighting needs of your vehicles with the Wolfram 24V bottomless bulb series. Make a difference with compact, reliable and versatile lighting solutions!

Festoon Bulbs Series

WOLFRAM
PREMIUM QUALITY

Bright, Clear and Reliable Lighting Solutions Wolfram's 24V halogen interior lighting series offers bright, clear and reliable lighting solutions designed for the interiors of commercial vehicles, trucks, buses and other heavy-duty vehicles. The products in this series provide excellent visibility for the driver and passengers, while offering durability and long-lasting use. Our series is designed to meet a variety of needs, from ceiling lamps to reading lamps, from dashboard lighting to general interior lighting. Thanks to halogen technology, it emits a natural and vibrant light, making the interior brighter and more comfortable.

Why Wolfram 24V Halogen Interior Lighting Series?

Bright and Clear Light: Improves visibility by providing natural and vibrant lighting.

Reliable Performance: Provides long-lasting and stable operation.

Various Applications: Suitable for ceiling, reading, dashboard and general interior lighting.

Durable Design: Highly resistant to vibrations and harsh conditions.

Easy Installation: Provides simple and quick installation.

Illuminate the interiors of your vehicles with the Wolfram 24V halogen interior lighting series. Enhance your driving experience with bright, clear and reliable lighting solutions!

Socket Indicator Bulbs Series

WOLFRAM
PREMIUM QUALITY

Reliable and Clear Indicator Lighting Wolfram's 24V indicator bulb series is specially designed for the instrument panels of commercial vehicles, trucks, buses and other heavy-duty vehicles. These bulbs increase driving safety by allowing drivers to see vehicle information clearly and accurately. The bulbs in our series are made of high-quality materials and have a long service life. By offering high light output with low energy consumption, they both save energy and ensure that the instrument panel is always clearly visible. They are compatible with various vehicle models with different color and size options.

Why Wolfram 24V Indicator Bulb Series?

Clear and Bright Lighting: Provides a clear view of the instrument panel.

Long-Lasting: Long-lasting thanks to high-quality materials.

Low Energy Consumption: Saves energy.

Wide Compatibility: Compatible with different vehicle models and instrument panels.

Reliable Performance: Works stably even in difficult conditions.

Reliably and clearly illuminate your vehicle's instrument panels with the Wolfram 24V indicator bulb series. Increase your driving safety and always have accurate information!

XenonLightingSolutions

High Intensity Lighting for 12V and 24V Vehicles XENON series are high-intensity discharge (HID) bulbs designed for both 12-volt and 24-volt vehicles. These bulbs produce significantly more light and provide a wider illumination area than halogen bulbs. XENON bulbs increase your safety by providing superior visibility at night and driving. Thanks to the high color temperature, XENON series bulbs illuminate the road in a color close to daylight. This allows the driver to see the road and the surroundings more clearly, helping to detect obstacles and hazards earlier. In addition, XENON bulbs produce more light while consuming less energy, which increases the energy efficiency of your vehicle.

Why XENON Series?

High Intensity Lighting: Produces much more light than halogen bulbs.

Wide Illumination Area: Illuminates the road and surroundings in a wider area.

Increased Safety: Provides superior visibility during night driving.

Energy Efficiency: Produces more light while consuming less energy.

Long Life: Has a longer life than halogen bulbs.

12V and 24V Compatibility: Suitable for both passenger cars and commercial vehicles.

Make your driving safer and more comfortable with XENON series bulbs. With its high performance, energy efficiency and long life features, XENON is your reliable partner in vehicle lighting solutions. Note: Installation of XENON bulbs may require expertise. Please contact an authorized service. Wolfram XENON bulbs have an E certificate in accordance with European standards.

Xenon Lighting Solutions

Xenon 8000K Bulbs Series

WOLFRAM
PREMIUM QUALITY

Different and Modern Appearance with Blue White Light The 8000 Kelvin XENON series adds a different and modern look to your vehicle with its blueish white light. Offering brighter and more striking lighting compared to halogen bulbs, these bulbs

provide better visibility during night driving. Suitable for both 12V and 24V vehicles, 8000K XENON bulbs are an ideal choice for drivers looking for a stylish and original look. The high performance of the products comes from the XENON special gas used. Wolfram XENON bulbs have an E certificate in accordance with European standards.

LEDXenon

High Performance with Advanced Lighting Technology Wolfram's LED Xenon series combines the latest lighting technologies to provide a superior lighting solution for your vehicles. The lamps in this series combine both the energy efficiency of LED and the brightness of Xenon to provide excellent visibility when driving at night. Thanks to their high-performance LED chips and special design, they illuminate your road more clearly and at a wider angle. The LED Xenon lamps in our series are made of durable materials and are long-lasting and reliable. Their waterproof, dustproof and vibration-resistant construction provides superior resistance to harsh weather and road conditions. Available in different color temperatures and power levels, our lamps offer solutions for all types of vehicles and driving needs. Thanks to their easy installation features, they can be quickly replaced with your existing halogen or Xenon lamps.

Why Wolfram LED Xenon Series?

LED and Xenon Technology: Combines the energy efficiency of LED and the brightness of Xenon.

High Performance: Provides excellent visibility during night driving.

Durable Construction: Waterproof, dustproof and vibration resistant.

Wide Fit: Available in different color temperatures and powers, suitable for all types of vehicles.

Easy Installation: Easily interchangeable with existing halogen or Xenon lamps.

Improve your driving safety and make your night journeys more enjoyable with Wolfram LED Xenon series. With its high performance, durability and wide range of applications, Wolfram is your reliable partner in lighting solutions with E certificate in accordance with European standards.

Luna LED Series

WOLFRAM
PREMIUM QUALITY

LUNALED's 6500 Kelvin fan car bulbs combine high-performance lighting with advanced cooling technology for an exceptional nighttime driving experience. The 6500K color temperature provides daylight clarity, helping you detect obstacles and hazards earlier. The integrated fan system prevents overheating, ensuring longer-lasting and stable performance.

- Daylight Lighting:** Natural clarity with 6500K color temperature.
- Integrated Fan System:** Extends bulb life by preventing overheating.
- Increased Safety:** Clearly illuminates the road and surroundings for early hazard detection.
- High Brightness:** Enhances driving comfort and visibility to other drivers.
- Durable Structure:** Vibration, water, and dust resistant.
- Wide Compatibility:** Available in various types (H4, H7, H11, etc.) for different vehicles.
- Easy Installation:** Quick replacement for existing halogen bulbs.

Make your night drives safer and more comfortable with LUNALED 6500K fan car bulbs. With superior lighting, advanced cooling, and easy installation, LUNALED is your reliable partner in vehicle lighting solutions, compliant with European standards.

LedWarningLights&LedBarsLightingSolutions

High Performance, Reliable Lighting Solutions with Low Energy Wolfram's LED lighting series offers high performance and reliable lighting solutions for your vehicles.

From overhead warning lights to fog lamps, from work lights to daytime running lights, this series is designed to meet your every need. Thanks to superior LED technology, it offers high light output, low energy consumption and long life. All products in our series are made of durable materials and are resistant to harsh weather conditions and impacts. Thanks to their easy mounting features, they can be seamlessly integrated into existing vehicle systems. Whether for professional use or for everyday driving, increase your safety and maximize your visibility with the Wolfram LED lighting series.

Why Wolfram LED Lighting Series?

Wide Product Range: From overhead beacons to fog lamps, Wolfram offers a wide range of options.

High Performance: High light output, low energy consumption and long life.

Durable Design: Made of materials resistant to harsh conditions.

Easy Installation: Easily integrated into existing vehicle systems.

Safety and Visibility: Increases your driving safety and maximizes your visibility.

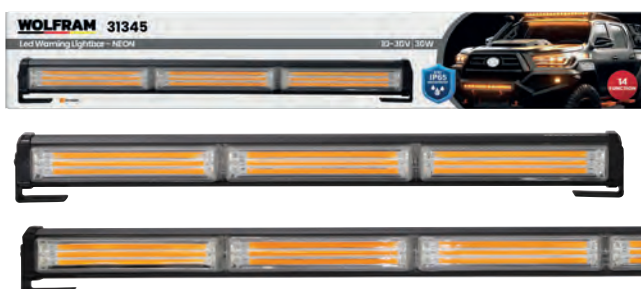

Meet the lighting needs of your vehicles safely with Wolfram LED lighting series. With high performance, durability and a wide range of products, Wolfram is your reliable partner with E certification in accordance with European standards for lighting.

Bright Solutions for Your Safety The Wolfram range of LED beacons is designed to deliver superior performance and reliability, even in harsh conditions. Whether you are in the roadside assistance, construction or emergency services industry, these lamps provide high visibility, maximizing your safety. The amber colored beacons in our range offer a particularly striking and universally recognized warning signal. Thanks to energy-efficient LED technology, you get a long-lasting and low-maintenance solution. With different sizes, mounting options and flash modes, you can find the best beacon for your needs with Wolfram quality.

High Intensity LEDs: Bright and efficient light output for maximum visibility.

Durable Design: Resistant to harsh weather conditions and vibration.

Energy Efficiency: Long life with low power consumption.

Various Mounting Options: Mounting solutions that easily adapt to different vehicle types.

Different Flash Modes: Adjustable flash options according to your needs.

Wolfram LED overhead warning lights have E certificate in accordance with European standards and guarantee your safety!

Led Warning Lights & Led Bars Lighting Solutions

LED End Outline Marker Lamps Series

WOLFRAM
PREMIUM QUALITY

At Wolfram, we pride ourselves on delivering high-quality lighting solutions tailored for the transportation industry. Our End Outline Marker Lamps Series has been meticulously designed to enhance visibility and safety for trailers and semi-trailers. These marker lamps are specifically engineered to withstand the rigors of outdoor use, featuring a waterproof design that ensures reliable performance in all weather conditions.

With a selection of 12 distinct products, we offer both right and left-side options to accommodate diverse needs. Each lamp combines cutting-edge technology with durable materials, ensuring long-lasting functionality and compliance with industry standards. Our marker lamps are not only practical but also designed to seamlessly integrate with your vehicle's aesthetic.

Explore our catalogue to discover how Wolfram's End Outline Marker Lamps can elevate the safety and visibility of your trailers, providing peace of mind on every journey.

Led Warning Lights & Led Bars Lighting Solutions

LED Rear Tail Lights Series

WOLFRAM
PREMIUM QUALITY

Safety and Style Combined Wolfram's Neon LED Tail Lights series completely revamps the rear view of your vehicles, combining both safety and style. Thanks to neon LED technology, these lights offer an extraordinary brightness and eye-catching appearance, allowing other drivers to recognize you in all conditions. The rear taillights in our range are made from high quality materials and are waterproof, dustproof and vibration resistant. This ensures a long-lasting and reliable performance. It adapts to all kinds of vehicle models with different design and color options. Thanks to its easy installation features, it can be quickly integrated into existing lighting systems.

Why Wolfram Neon LED Tail Lights Series?

Neon LED Technology: Provides exceptional brightness and eye-catching appearance.

High Visibility: Allows you to be easily recognized by other drivers.

Stylish Design: Adds a modern and unique look to your vehicles.

Durable Construction: Waterproof, dustproof and vibration resistant.

Wide Fit: Suitable for all kinds of vehicle models with different design and color options.

Easy Installation: Can be easily integrated into existing lighting systems.

Increase your safety and add a unique style to your vehicle with Wolfram Neon LED Tail Lights series. With high performance, durability and aesthetic design, Wolfram is your trusted partner in lighting solutions with E certification in accordance with European standards.

LED Fog Lamps Series

WOLFRAM
PREMIUM QUALITY

Clear Vision in Bad Weather Wolfram's range of LED fog lamps are designed to improve your driving safety in foggy, rainy or snowy weather. They offer a powerful and focused beam of light thanks to high-intensity LEDs, significantly increasing visibility. They help prevent accidents by making it easier for other drivers to spot you. The LED fog lamps in our range are made from durable materials and are waterproof, dustproof and impact resistant. This ensures reliable performance in extreme weather and road conditions. Available in different sizes, shapes and colors, our lamps adapt to all types of vehicles. Thanks to their easy installation features, they can be quickly integrated into existing lighting systems.

Why Wolfram LED Fog Lamps Series?

High Intensity LEDs: Provides clear visibility in foggy, rainy and snowy weather.

Increased Safety: Helps prevent accidents by increasing visibility.

Durable Construction: Waterproof, dustproof and shockproof.

Wide Fit: Available in different sizes, shapes and colors, suitable for all types of vehicles.

Easy Installation: Can be easily integrated into existing lighting systems.

With the Wolfram range of LED fog lamps you can enjoy a safe and comfortable driving experience even in bad weather conditions. With high performance, durability and a wide range of applications, Wolfram is your reliable partner for lighting solutions. Our products comply with European standards and all products are E-certified.

MotorcycleLightingSolutions

Wolfram offers a range of lights specifically designed for motorcycles, providing optimum visibility and safety on the road. These high-performance lights provide bright illumination, increasing rider visibility in a variety of conditions, day or night.

Advanced Brightness: Increases road visibility for safer riding experiences.

Durable Construction: Built to withstand harsh weather conditions and vibrations, and built to last.

Stylish Design: A stylish addition to any motorcycle, complementing its aesthetics while ensuring functionality.

Easy Installation: Designed for quick and seamless integration with existing motorcycle systems.

Illuminate your ride with Wolfram motorcycle lights, the perfect blend of performance, durability and style for every motorcycle enthusiast.

Motorcycle Lighting Solutions

Halogen Headlight Bulbs

WOLFRAM
PREMIUM QUALITY

Safe and Clear Vision Our halogen bulb series, specially designed for motorcycles, has been developed to provide superior visibility and increase your safety during day and night driving. These bulbs are designed to suit the special needs of motorcycles and stand out with their vibration-resistant structures and high-performance lighting. Our motorcycle halogen bulbs offer a brighter and wider illumination area compared to standard halogen bulbs. In this way, it allows you to see the road and the surroundings more clearly, helping you to notice obstacles and dangers earlier. It also increases your safety by allowing other drivers to notice you more easily.

Why Special Halogen Bulbs for Motorcycles?

Vibration Resistant Design: Designed for the harsh conditions of motorcycles.

High Performance Lighting: Provides a brighter and wider illumination area than standard halogen bulbs.

Increased Safety: Allows you to see the road and surroundings more clearly, allowing other drivers to notice you more easily.

Easy Installation: Easily replaceable with existing halogen bulbs.

Wide Compatibility: Available in various types compatible with different motorcycle models.

Make your rides safer and more enjoyable with our special halogen bulbs for motorcycles. With its high performance, durability and easy installation features, it has an E certificate in accordance with European standards and is your reliable partner in motorcycle lighting solutions.

Air Compressors

WOLFRAM
PREMIUM QUALITY

Powerful and Reliable Air Compressors in Wolfram's vehicle accessory series. It offers ideal special solutions for inflating your tires on the road or in your garage, filling your sports equipment and many other jobs. Thanks to their high-performance engines and durable designs, they offer power and reliability to meet all your needs. The air compressors in our series can be easily stored in your vehicles and are ready for use whenever you need them, thanks to their compact and portable features. Thanks to their digital displays and automatic shut-off features, inflating your tires to the correct pressure is now much easier and safer.

Why Wolfram Air Compressors?

High Performance: Provides fast and effective inflation.

Resistant Design: Made from durable materials for long-lasting use.

Portability: Thanks to its compact design, it can be easily carried and stored.

Ease of Use: It is user-friendly with its digital display and automatic shut-off features.

Multi-Purpose Use: Ideal for inflating tires, filling sports equipment and many more.

Stay safe on the road and always be prepared with Wolfram vehicle accessory series air compressors. Powerful, reliable and convenient air compressors. Make your life easier and save time with compressors!

Horns

WOLFRAM
PREMIUM QUALITY

Safe and Effective Manoeuvres Wolfram's reversing horn series is designed to ensure safe and effective manoeuvres for cars, trucks and construction equipment. With their high sound output and durable construction in accordance with European standards, these horns are ideal for warning pedestrians and other vehicles when reversing. They increase driving safety, especially in heavy traffic and narrow spaces. The reversing horns in our series are available in different sound levels and frequencies, so you can find the right option for every vehicle and environment. Thanks to their easy-to-install features, they can be quickly integrated into existing vehicle systems. Their waterproof and impact-resistant designs ensure reliable performance even in harsh weather conditions.

Why the Wolfram Reversing Horn Series?

High Sound Output: Provides effective warning during reversing manoeuvres.

Wide Application Area: Suitable for cars, trucks and construction machinery.

Durable Design: Waterproof and shockproof.

Easy Installation: Provides quick and simple installation.

Different Options: Available in different volume levels and frequencies.

Increase your driving safety with the Wolfram reverse horn series. With its high performance, durability and easy installation features, Wolfram reverse horns are an indispensable assistant for safe maneuvers.

Relays

WOLFRAM
PREMIUM QUALITY

Reliable, High-Performance Electrical Control Wolfram's relay series is designed to provide reliable and efficient control of both 12-volt and 24-volt vehicle electrical systems. From cars to trucks, motorcycles to construction equipment, these relays are ideal for switching electrical circuits on and off, sending signals and performing a variety of other control functions. Made from high quality materials, Wolfram relays withstand harsh operating conditions and have a long service life. Thanks to their compact design, they are easy to install and can be seamlessly integrated into existing systems. Our various models with different amperage ratings and contact configurations offer solutions for every need.

Why Wolfram Relay Series?

Wide Application Area: Can be used in 12V and 24V vehicle electrical systems.

High Reliability: Stable performance even in harsh conditions.

Long Life: Lasts a long time thanks to high quality materials.

Easy Installation: Easy to install thanks to its compact design.

Various Models: It meets various needs with different amperage values and contact configurations.

Control the electrical systems of your vehicles safely with Wolfram relay series. High performance, long life and a wide range of applications make Wolfram relays your reliable partner in electrical control.
